CrystalTop

EPOXY TERRAZZO

Description

CrystalTop is a seamless flooring system comprised of a multi-pack kit containing colored epoxy resin, fillers, and decorative aggregates such as glass and marble chips, Mother of Pearl, and mirrors. The components are mixed together and cast over concrete floors typically in 10-12 mm thickness. Grinding and polishing reveal the aggregates and produce an attractive and colorful yet highly durable, hygienic and seamless floor. Divider strips made of zinc or brass in various thicknesses are used to separate colors and add design accents.
