

PaveCrete 700

MICRO EXPOSE
CONCRETE

FUNCTIONAL YET ELEGANT

PaveCrete Micro Expose Concrete is an exposed aggregate finish having a light texture with aggregates up to 3 mm, achieving a slip resistance up to R13/R11 dry/wet. With its textured sandy appearance, PaveCrete Micro Expose Concrete provides a more elegant alternative to other functional pavement finishes such as broom finished concrete, while also being more subtle than other decorative slip-resistant finishes such as traditional exposed aggregate concrete.

AN ECONOMICAL ALTERNATIVE

Unlike integrally-colored exposed aggregate concrete, PaveCrete Micro Expose Concrete is typically produced with uncolored ordinary Portland cement concrete even for light tone colors, enabling significant cost savings by eliminating the need for white-cement based concrete mixes and integral color admixtures. Produced by applying PaveCrete 700 Exposed Aggregate Dry Shake on freshly poured concrete, light tone colors are achieved by surface coloring and conditioning of the fresh concrete. Decorative aggregates are blended with the PaveCrete 700 powder and exposed by abrasive washing of the cured concrete surface.

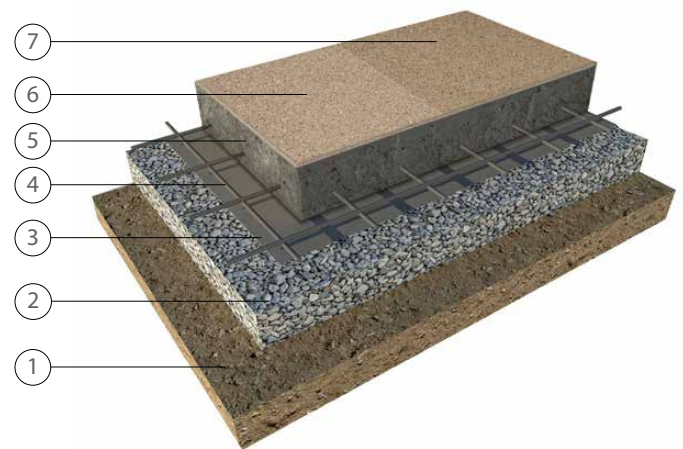

UNLIMITED CHOICES, UNLIMITED AVAILABILITY

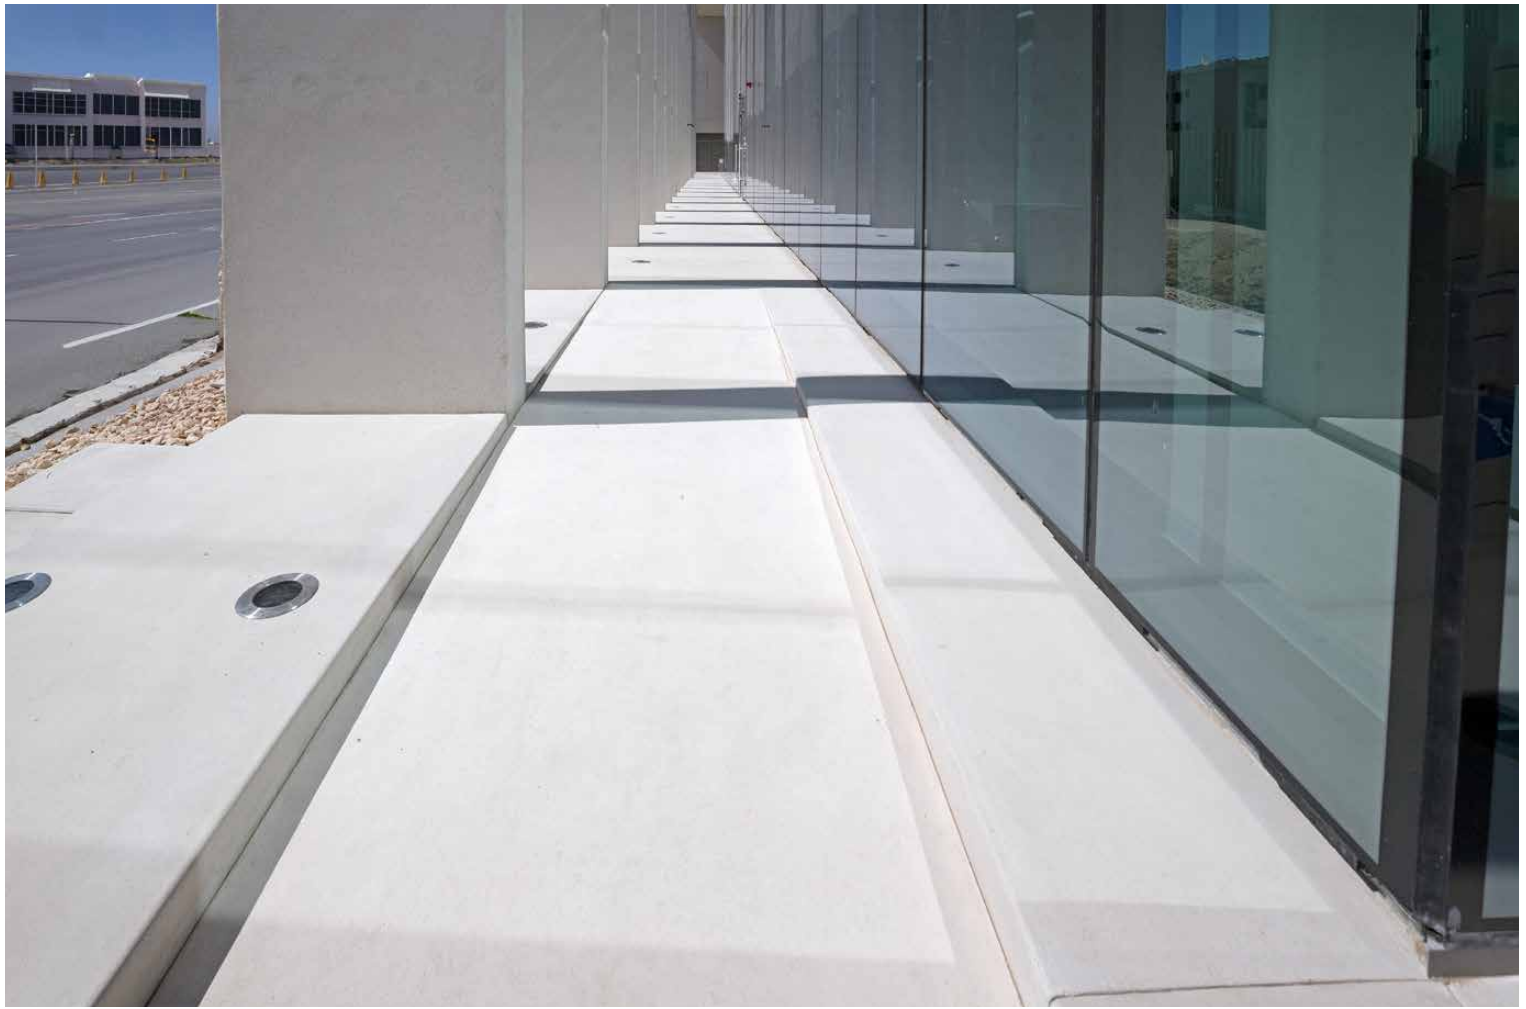

With a wide selection of colored marble chips, glass chips and quartz to choose from, and over 40 standard matrix colors, PaveCrete 700 is available in an infinite array of standard and custom blends to suite any requirement. And because PaveCrete 700 is a surface treatment of the concrete, it is easily provided at any remote geographic location at a reasonable cost; only OPC concrete is needed.

The System

1. Soil.
2. Compacted road base.
3. Polyethylene sheet.
4. Steel mesh reinforcement.
5. Concrete.
6. PaveCrete 700 Exposed Aggregate Dry Shake.
7. Protective sealer: A-Z Ultra sealer, A-Z Mega sealer or ElastoCrete 212.

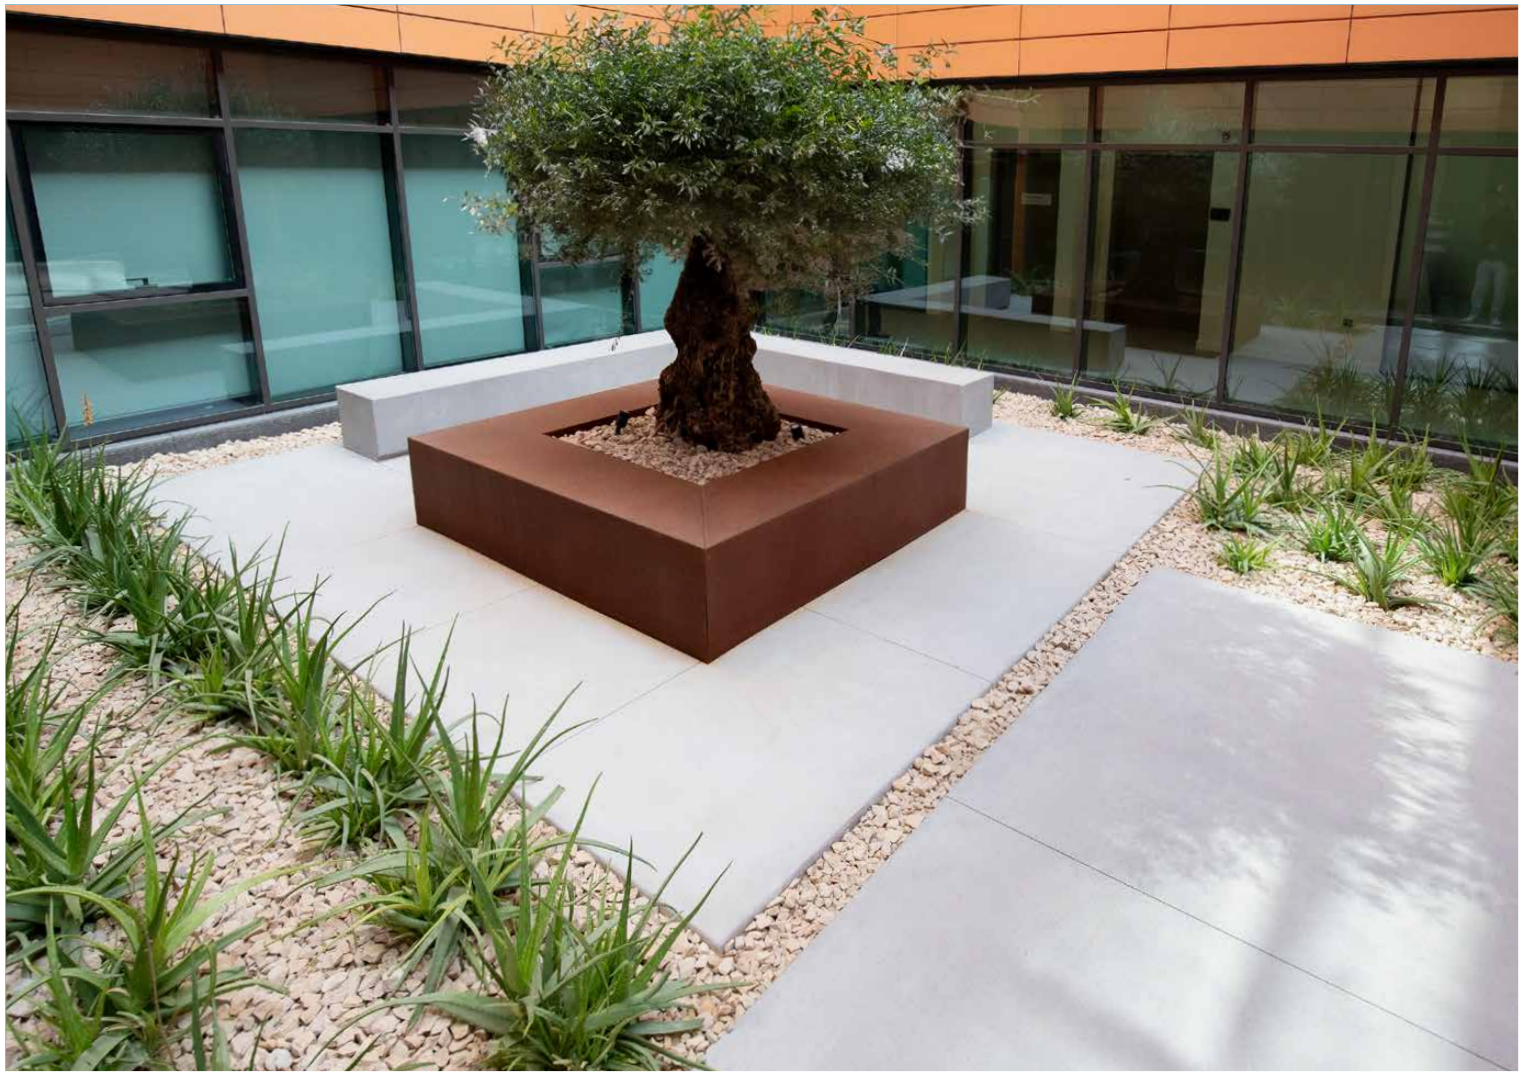

Advantages

- A decorative finish that is highly functional and versatile.
- High abrasion and wear resistance
- Surface texture subtle enough for interior use
- A selection of topical Sealers for lasting beauty and stain resistance.
- Wide choices of colors.
- Excellent slip resistance.
- No integral coloring required.
- Economical and easy to apply.
