TEXTURED
CONCRETE

What is PaveCrete Textured Concrete?

Description

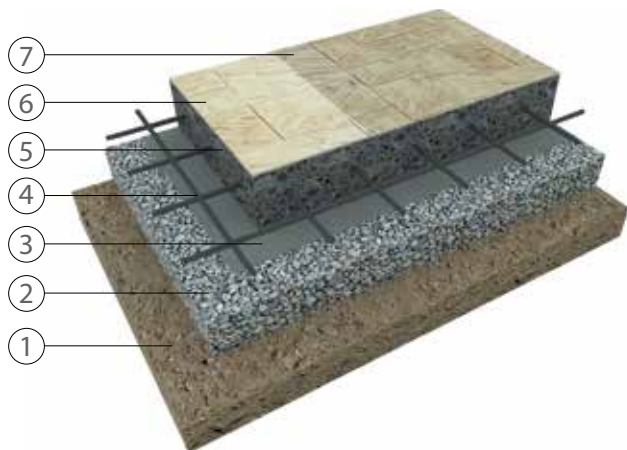

PaveCrete Textured Concrete is a monolithic, cast in-situ concrete slab that is surface treated with PaveCrete 200 Color Hardener and/or thoroughly colored with PaveCrete 500 Color Admixture. The surface of the concrete slab is textured in the plastic stage with CCC's high quality stamping tools to simulate natural stone, slate, tiles, and pavers at a lower cost and better structural performance. With an infinite choice of color combinations and a wide selection of stamping tools, PaveCrete Textured Concrete is an affordable and readily available choice for paving with excellent aesthetic appeal to suite any taste or application, from private residences to theme parks.

Advantages

- ✓ Wide range of colors and textures.
- ✓ Durability & longevity of concrete.
- ✓ Quick installation.
- ✓ Low maintenance.
- ✓ Low life-cycle cost.
- ✓ Readily available.

System detail

1. Soil.
2. Compacted road base.
3. Polyethylene sheet.
4. Steel mesh reinforcement.
5. High strength concrete mix design, optionally treated with PaveCrete 500 color admixture.
6. Surface conditioned with PaveCrete 200 Color Hardener & PaveCrete 300 Release Agent.
7. Sealer coat.

The Materials

Coloring

PaveCrete 200

Premium Color Hardener

A ready-to-use, colored, metal free, dry shake color hardener specially formulated with graded silica aggregates, admixtures, and UV-resistant pigments for decorative concrete applications.

PaveCrete 500

Integral Color Admixture

A powdered admixture formulated from UV-resistant metal oxide pigments designed to give concrete uniform and permanent integral color.

Release Agent

PaveCrete 300

Antique Release Agent

A colored, powdered release agent designed to prevent concrete from adhering to texturing mats while creating a variegated and antiqued color effect.

PaveCrete 400

Liquid Release Agent

A clear or tinted, liquid release agent designed to prevent concrete from adhering to texturing mats. Allows the concrete to be sealed the next day without the need to wash off excess release.

Sealers

A-Z Ultra Sealer

Solvent-Borne Acrylic Sealer

A high performance, deep penetrating Ethyl Methacrylate sealer designed for protecting concrete against stains and moisture absorption. Available in gloss and matt finish.

A-Z Mega Sealer

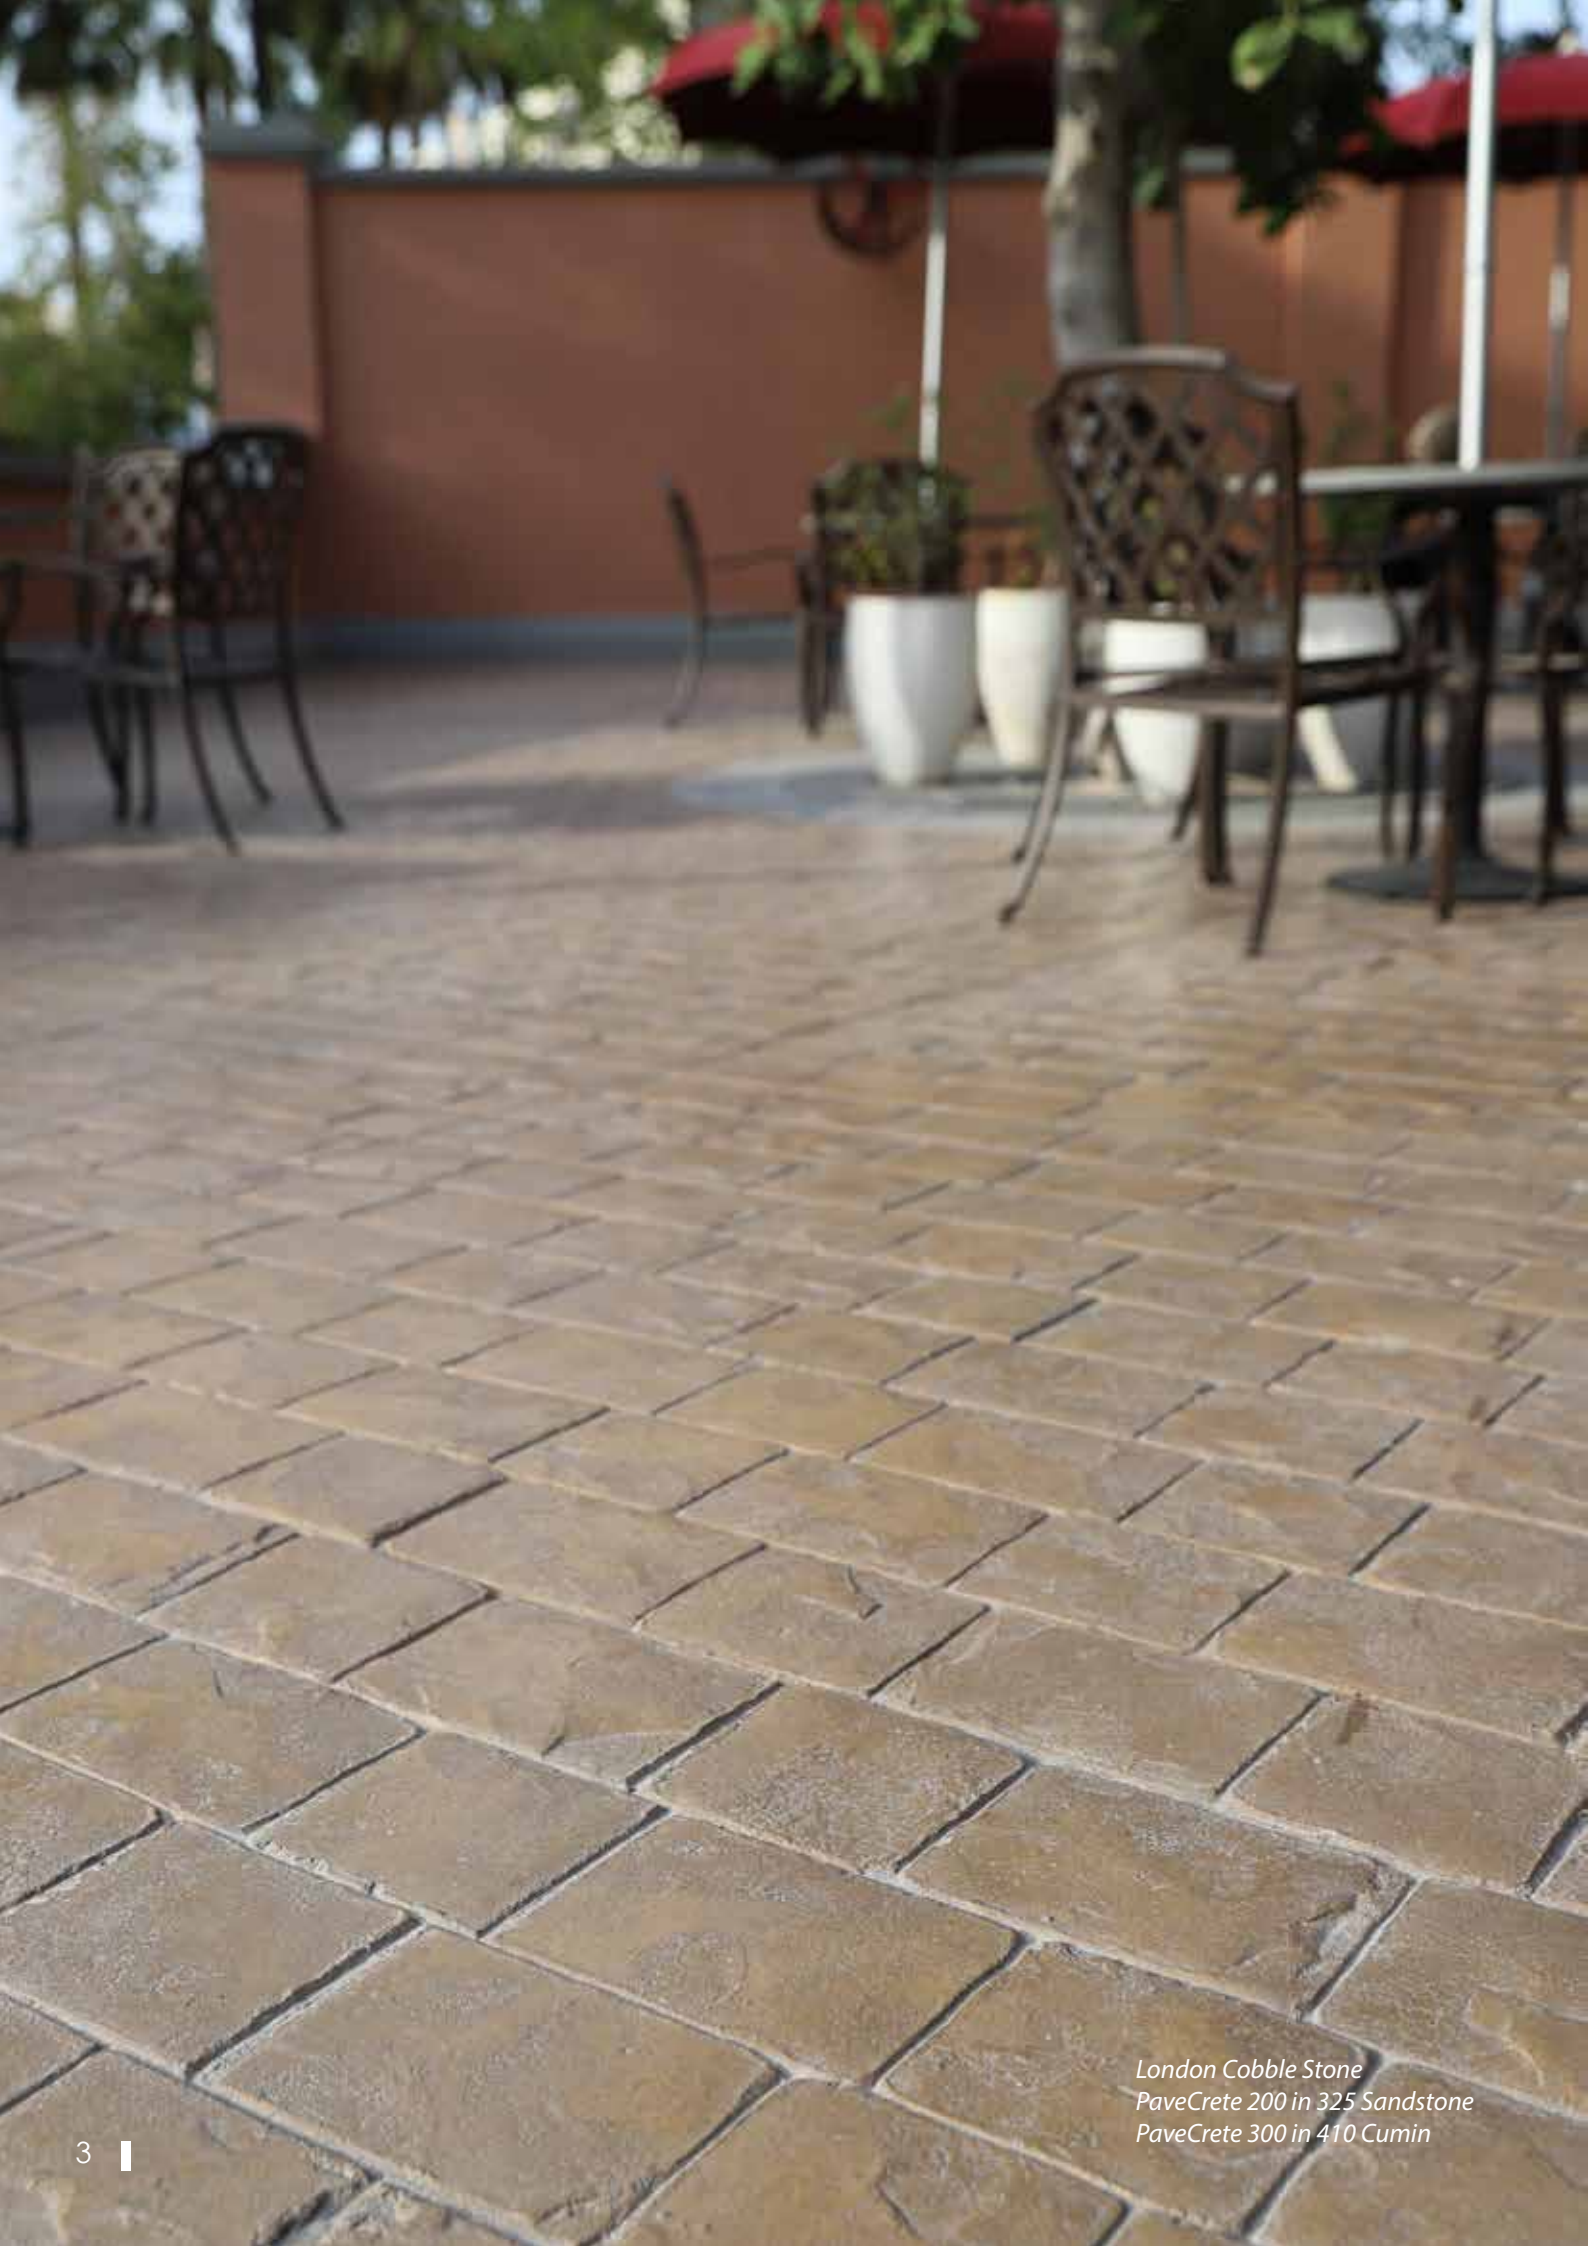

Water-Based 1K Polyurethane Sealer

A UV-resistant, low VOC, single component acrylic-urethane sealer coat. Available in semi-gloss finish.

ElastoCrete 212

Water-Based 2K Polyurethane Sealer

A UV-resistant, low VOC, two-component clear polyurethane sealer coat formulated for maximum chemical resistance. Available in glossy and matte.

Unparalleled Structural Integrity & Durability

PaveCrete Textured Concrete is composed of a monolithic, load-bearing concrete slab, most often structurally reinforced with steel mesh. Hence, unlike unit pavers, local loading is distributed across the slab, allowing the stamped concrete slab to carry heavy vehicular loads without experiencing structural failures or deformations due to loading for many years. Furthermore, the slab's structural integrity make it less sensitive to substrate settlement and movement, thereby eliminating surface undulations over time and trip hazards.

PaveCrete Textured Concrete combines the strength, structural integrity, and durability of concrete with the beauty and appeal of natural stone, slate, wood and tile paving.

PaveCrete Textured Concrete is a versatile system that is readily available and can be customized to any taste and requirement.

PaveCrete Textured Concrete adds value and differentiation to any project, from residential to heavy commercial. The high abrasion resistance from PaveCrete 200 Color Hardener, with its three-fold increase in abrasion resistance over regular concrete, insures lasting beauty for many years to come.
