TopCrete 220
MICRO TOPPING

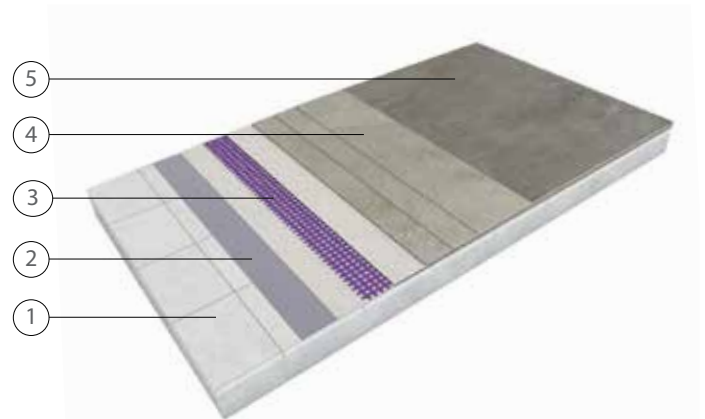

MINIMALIST, the design approach and appeal of the TopCrete 220 Micro Topping system. **SEAMLESS SURFACES** and the nuanced color variations of cementitious surfaces combine to create a stunning yet subtle continuity of space that is both comforting and immersive. Gone are the interruptive joint lines of tile and marble, with TopCrete Micro Topping continuous and seamless horizontal and vertical surfaces are created to grab eyes without distracting from other elements in the space.

DOESN'T GET ANY EASIER. TopCrete 220's single-component, cement-based dry powder formulation makes it a breeze to apply: just add water in varying proportions depending on the desired effect and apply by trowel, squeegee, brush or even spray, in a multi-coat system to a total thickness of 2-3mm. And TopCrete 220 comes from the factory pre-dosed with UV-resistant metal oxide pigments, taking the guessing game out of the process.

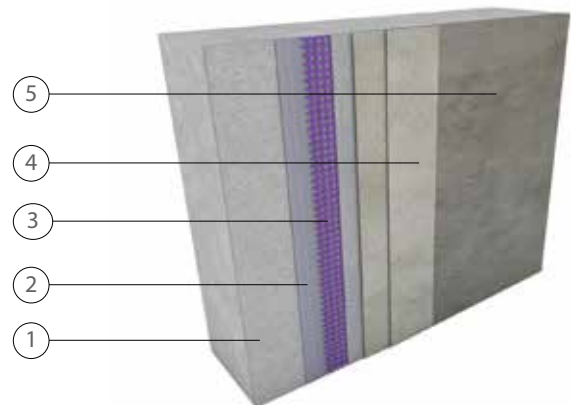

System Details On Floors

1. Concrete Substrate or Tiles.
2. PrimeBond XT (for ceramic tiled substrate).
3. BondCrete w/ embedded ShieldCrete reinforcing mesh (Optional).
4. TopCrete 220 multi layers.
5. Sealer coat.

System Details On Walls

1. Plaster, concrete, or plaster board.
2. FoamFix ST/XT (not required for smooth plaster or concrete).
3. ShieldCrete mesh (Optional).
4. TopCrete 220.
5. Sealer coat.
